SAHIN AKTAR MONDAL

OBJECTIVE

Angular Development | front-end knowledge | Dynamic mesh solution

A results-driven Angular developer with a strong track record of designing and delivering highly dynamic, responsive, and scalable web applications. Skilled in modern front-end technologies including **HTML5, CSS3, JavaScript (ES6+), TypeScript**, and frameworks such as **Angular CLI** and **Angular Material**. Demonstrates deep expertise in Angular architecture and best practices to build clean, maintainable, and performance-optimized UI components.

Possesses extensive experience in cross-functional collaboration, ensuring timely delivery of features within Agile development environments. Adept at using version control systems (Git), implementing continuous integration workflows, and applying unit testing methodologies to ensure code reliability. Dedicated to continuous learning and staying current with emerging technologies to deliver long-term value and innovation in every project.

SKILLS

- **Angular**
- **HTML5**
- **CSS3**
- **JavaScript**
- **Typescript**
- **Rxjs**
- **Unit testing (Jasmin and Karma)**

EXPERIENCE

Navigators Software Private Limited   **20/12/2021 - Present**
Angular Developer

PROJECTS

DB Supply - PIM platform(https://pimdev.dbsupply.com/ **)**
DB Supply is a robust and scalable Product Information Management (PIM) platform engineered to optimize order tracking, inventory management, and product cataloguing. Developed using **Angular 14**, **TypeScript**, **JavaScript**, **HTML5**, and **CSS3**, the platform delivers a modern, responsive user interface. It supports over 1,000 configurable features, including advanced report classification across five hierarchical levels, to accommodate complex business needs. Real-time data updates are enabled through **RxJS**, while seamless integration with 10+ external APIs ensures efficient data transformation and interoperability. To maintain code quality and reliability, the platform is thoroughly tested using Jasmine and Karma. DB Supply is designed to meet the demands of fast-paced, dynamic business environments with a focus on performance, usability, and maintainability.

SQY APP - B2B platform(https://dev.sqy.app/ **)**
SQY App is a dynamic **B2B** platform that connects over 1,000 users for seamless product buying and selling. Developed using **Angular 16**, **TypeScript**, **JavaScript**, **HTML5**, **CSS3**, and **RxJS**, the platform delivers real-time data updates and integrates with multiple APIs to ensure scalability and performance. Optimizations in the front-end architecture contributed to a 20% increase in user engagement. The application emphasizes a responsive, user-friendly interface, clean code practices, and robust functionality, supported by unit testing frameworks such as Jasmine and Karma to ensure code reliability and maintainability.
